

## Myrexis to Present at Jefferies 2011 Global Healthcare Conference

SALT LAKE CITY, May 25, 2011 (GLOBE NEWSWIRE) -- Myrexis, Inc. (Nasdaq:MYRX), a biotechnology company focused on developing and commercializing novel treatments for cancer, today announced that Adrian Hobden, Ph.D., President and Chief Executive Officer, is scheduled to present an overview of the Company at the Jefferies and Company 2011 Global Healthcare Conference to be held June 6 — 9, 2011, in New York City.

Dr. Hobden and Robert Lollini, Chief Financial Officer and Treasurer, will be available to participate in one-on-one meetings with investors registered to attend the conference.

Event: Jefferies 2011 Global Healthcare Conference

Date: Monday, June 6, 2011

Time: 9:30 am (EDT)

The presentation will be audio webcast live and can be accessed by visiting the investor relations section of Myrexis' website at [www.myrexis.com](http://www.myrexis.com), or via the following link: <http://www.wsw.com/webcast/jeff60/myrx/>. The webcast will be archived for 90 days.

### About Myrexis, Inc.

Myrexis, Inc. is a biotechnology company focused on developing and commercializing novel treatments for cancer. The Company has leveraged a unique understanding of the genetic causes of human disease to generate a strong pipeline of clinical and pre-clinical product candidates. These include compounds with distinct mechanisms of action and novel chemical structures that have first-in-class and/or best-in-class therapeutic potential. Myrexis is led by an experienced management team with expertise in all aspects of pre-clinical, clinical and commercial drug development.

The Company's oncology program is comprised of two clinical-stage programs and one pre-clinical stage program. Myrexis' pipeline is led by [Azixa](#)<sup>®</sup> (verubulin, MPC-6827), a novel small molecule microtubule destabilizing agent which is targeted to the brain. It is in Phase 2b clinical development for the treatment of glioblastoma multiforme. The Company's Hsp90 program is comprised of novel, potent, small molecule oncology compounds including [MPC-3100](#), a fully-synthetic and orally bioavailable inhibitor of Hsp90 in Phase 1 clinical development and [MPC-0767](#), a novel L-alanine ester pro-drug of MPC-3100, with improved aqueous solubility. [MPC-9528](#), currently in IND-enabling studies, is the lead pre-clinical candidate in the Company's Cancer Metabolism Inhibitor (CMI) program. Myrexis is also evaluating [MPI-0485520](#), an orally bioavailable, potent and selective small molecule inhibitor of type I interferon that is being developed for the treatment of autoimmune diseases.
